HEN/HERE! Website Launch

We are excited to announce the launch of our new website. Please check out our new site at <http://haltonenvironment.ca> . We are quite pleased with the functionality and hope you will find it more useful and user-friendly than our previous website. Any feedback is appreciated.

Upcoming HERE! Events

· HERE! GeoTour

Are you thinking about a cost-effective, greener, and more efficient way to heat and cool your home? HERE! will be having its first ever Geothermal Information Session and GeoTour in Georgetown on Thursday, August 12 from 7:30 p.m. to 9:30 p.m. HERE!'s thermal technology specialist, Chris Braekevelt, will be giving an in-depth presentation on geothermal heating/cooling systems for your home, he will show you an actual geothermal system and its components, and will be answering any questions you may have. There are a limited number of spaces available so registration is required for this event. Please email here.office@gmail.com for further information or to register.

· HERE! Focus Group

Come join us for an evening of discussion surrounding the HERE! Project. We are looking for feedback on topics such as: What can we do to make the HERE! experience more valuable? How effective are we at keeping you up to date on renewable energy issues? The focus group takes place in our office in downtown Oakville on Thursday August 19 from 7:00 – 9:00 p.m. Refreshments will be provided. Please email here.office@gmail.com to register.

· HERE! Solar Tour

Our next solar tour will be on Sunday, August 29 in North Milton. Details will follow shortly.

· HERE! Renewable Energy Fair

HERE! will be having a renewable energy fair on Saturday September 11 from 1:00-4:00 at the Halton Regional Centre on Bronte Road in Oakville. There will be solar and geothermal vendor displays and

workshops on solar, geothermal, and energy conservation. This is sure to be an exciting event for those of you that want to connect directly with vendors or participate in our workshops.

Energy Conservation Package

We all know that installing a renewable energy system is a big commitment. But did you know that making small changes in your lifestyle can dramatically alter your environmental footprint while saving you money at the same time? We have an energy conservation package available for our contact list to borrow. It comes with an electronic energy meter and useful handouts and tips so that you can monitor how much energy you are using. Most people are surprised to see how much energy appliances that are "OFF" are using. If you are interested in borrowing the electronic energy meter, please email here.office@gmail.com
