MicroFIT news

- The opportunity to submit feedback during the recent 30-day consultation period on the new price category for ground-mounted solar PV projects has ended. The microFIT team will make an announcement about the new price category as soon as possible following review of the materials and information received. Click [here](#) to read the letter that HERE! submitted to the OPA on behalf of its project participants.
- If you received a notice that your microFIT application has been unlocked with instructions to resubmit your application with additional information, the deadline to resubmit your microFIT application has been extended to Tuesday, September 7 at 5 p.m. This extension will provide you with more time, if needed, to assess your project under the new category for ground-mounted solar PV projects. Resubmitted applications for ground-mounted projects will be offered the price that is to be finalized after the consultation period. If you do not resubmit your application by September 7, it will be withdrawn from the program. You may submit a new application in the future if you decide to proceed with a microFIT project at a later date.

Upcoming HERE! Events

• HERE! GeoTour

This is a reminder that our geothermal information night will be taking place next Thursday August 12 from 7:30 p.m. to 9:30 p.m. HERE!'s thermal technology specialist, Chris Braekevelt, will be giving an in-depth presentation on geothermal heating/cooling systems for your home. The tour will take place at Devereaux House, located at 11494 Trafalgar Road. You will have the opportunity to tour this 1860s farmhouse and learn about its extensive renovations which included many sustainable technology upgrades such as geothermal heating and cooling, occupancy sensors, and energy efficient LED lighting. There are still a few spaces available. Registration is required for this event. Please email here.office@gmail.com for further information or to register.

- **HERE! Focus Group**

Come join us for an evening of discussion surrounding the HERE! Project. We are looking for feedback on topics such as: What can we do to make the HERE! experience more valuable? How effective are we at keeping you up to date on renewable energy issues? The focus group takes place in our office in downtown Oakville on Thursday August 19 from 7:00 – 9:00 p.m. Refreshments will be provided. Please email here.office@gmail.com to register.

- **HERE! Solar Tour**

Our next solar tour is tentatively scheduled for Sunday, August 29 in North Milton. Details will follow shortly.

- **HERE! Renewable Energy Fair**

HERE! will be having a renewable energy fair on Saturday September 11 from 1:00-4:00 at the Halton Regional Centre on Bronte Road in Oakville. Details to follow shortly.
